Astana Medical University

Dainius Pavalkis

Chairman of the Board,
Rector of the NpJSC “Astana Medical University”
Doctor of Medical Sciences, Ph.D., Professor

I'm glad to welcome you to Astana medical University of Medicine and Pharmacy of the Republic of Kazakhstan - the single institution of higher education in our country that trains specialists in medicine, dentistry and pharmacy.

Accredited at the national level and assessed by international bodies, AMU offers optimal conditions of undergraduate and postgraduate training. Renowned doctors and experts are ready to present you the great mysteries of medicine and help you become a good specialist. The training process involves advanced methods of teaching-learning-evaluation by using modern technologies. Here you'll have the possibility to be involved in research activity, master foreign languages, participate in traineeships abroa, participate in different sport activities, cultural events etc.

Yearly, more than 2000 students from kazakhstan and from about 10 countries of the world study at *Aastana Medical University*.

You are invited to become part of our big family!

Astana Medical University

Astana Medical University (AMU) is one of the biggest and dynamic medical university in Kazakhstan. The AMU enjoys a high reputation in the sphere of higher medical education, has its own traditions in the area of educational services as well as in the development of medical sciences and clinical activities.

On 26th October 1964 the Council of Ministers of the Republic had adopted the resolution on the opening of a Medical Institution in Tselinograd. In 1997 the institute was reorganised into the Academy, and in January 2009 it gained the university status. Based on the resolution of the Government of the Republic of Kazakhstan the University entered into the structure of the National Medical Holding. It is significant that the change in the name and status of the university was followed by an increase in the number of courses and students. Moreover, the academic credit system and three-tiered system of education with Bachelor, Masters, and PhD Degrees were introduced. At present, we actively work on the introduction of innovative technologies into the educational process. The clinical bases of the University are located at the biggest national and republican centres (the subsidiary organisations of the National Medical Holding). For many years the University has been stably ranked as one of the leading medical university in Kazakhstan. Our academic partners are the leading universities of the US, Singapore, Europe, and Russia. Further success of our graduates in finding the employment and career building confirms the quality of education we are offering.

The status of the University sets forth new objectives in the areas of medical education and science, thereby uncovering broad perspectives for the long-term sustainable development.

Faculty of Medicine

Course Duration: 5 years.

Medium of instructions: English

Students start their studies with pre-clinical courses, where general subjects are taught. In the IIIrd year clinical disciplines are included. These lessons are carried out at the University Chairs (Departments) where students develop their practical skills.

The curriculum of the Faculty of Medicine meets the standards of the curricula of similar faculties in France, Germany, Russia, Ukraine, USA and Israel, according to the recommendations of the World Health Organization and Association of Medical Schools in Europe concerning the medical education. The Faculty of Medicine uses problem-based learning approach and tends to implement methods of evidence-based medicine in future.

For International students Medium of studying medicine is English. After graduation students usually have to pass a screening test when going back to their countries. Teaching materials from the countries of their origin are used in training in order to help them.

What do you need to know?

How to apply?

Students are enrolled once a year, in the period: July-August

In order to be admitted to the entrance contest, the applicants must hand in the following documents:

- Application form;
- A copy of the foreigner's national passport valid not less than one year;
- Application form, submitted by the applicant;
- A copy of NEET score card for Indian applicant.

- A copy of the school leaving certificates apostille from Ministry of Justice (Education) from the applicant's country.

- 8 passport size photos.

After the above mentioned documents are examined, the applicants will receive an acceptance letter from the University.

Tuition fee

The tuition fee has to be paid in advance for every academic year.

The University have rights to change the fee structure during the period of study.

The tuition fee covers: attendance of the courses (practical and theoretical), library entrance and use of the resources, lessons at the University Center of Simulation in Medical Training (in accordance with the curriculum), use of the laboratories and the equipment during the academic year.

The tuition fee does not include the costs of accommodation, admission fee, registration and legalization of residence in the Republic of Kazakhstan.

Food and Accommodation

"HOME AWAY FROM HOME". Choosing a university is also about choosing a new home. We ensure that students must live in a healthy environment that helps them to grow and learn without any obstacle. Astana Medical University is not providing hostel facility to foreign students however for local students university have its own dormitory building. The Representative of respective country are sole responsible for security and accommodation for the students. The concerned staff looks after university assets and ensures that the hostel remains responsive all the time.

The mess of the university is spacious and equipped with comfortable dining furniture. It provides hygienic and nutritious food to the students. The students decide the weekly menu according to which meals are prepared and served. Mess staff is conscious about the cleanliness and quality of food in a hygienic manner.
